TRUPHONE FOR THINGS

QUICK START GUIDE

Thank you for choosing Truphone. You are just a few steps away from being connected to our Global mobile network.

Step 1:
Now that you have your SIMs, go to
truphone.com/connectit

Step 2:
Follow the instructions to select your
data plan and activate the SIM card.
(You will receive confirmation when the activation
is complete and the SIM card is connected.)

Step 3:
Insert the SIM card in the device you
are connecting. You are now up-and-
running.

Managing your connectivity
Monitor and manage your SIMs in real
time, anywhere in the world, through our
powerful IoT Connectivity Management
Platform: iot.truphone.com

From the moment you are up-and-
running, you can use this to:

- Manage SIMs, Subscriptions and
  Devices
- Automate deployments with
  business rules to optimise
  costs, detect fraud and improve
  operations
- Report patterns of the connectivity
  and the devices
- Integrate with other platforms and
  cloud providers

TRUPHONE

A single global network for every device.

Patented multi-IMSI technology to switch to the best network carriers.

Multiple network access technologies: 2G, 3G, 4G and LTE-M options available.

Simple global pricing plans.
